H ams and Eggs, 8 AM. each Saturday at the Mirage Restaurant, 257 North Front Street, Belleville,Ont.

2 metre net- every Thursday at 7 PM. on repeater VE3KBR. Swap net to follow regular net.

Regular meetings, 3rd. Wednesday each month excepting July and August.

Regular meeting for the Picton Radio Club is the first

Thursday in the month.

Starting with the September meeting there will be door prizes. The prize for this month are a multi-meter also for all new Hams there will be a special prize, that of a FREE MEMBERSHIP for 1991-92

On Sept 24, 1991 there will be a Amateur Radio Display sponsored by The Canadian Legion Tweed.

There will be a Flea Market on Sept 21, 1991 at Saint Margaret's Church Sir John A MacDonald Blvd. across from Sears in Kingston . It starts at 9:00 AM.

The October Meeting will be a tour of the Lenox Generating Plant. Members will meet at the Mall parking lot behind the Shell Station between 6:15 and 6:30 October 16th.

The following was sent in by Don Newlands VE3HGN R.R. # 4 Colborne Ont. K0K 1S0

Captain Willian (Bill) Allan remembered

Bill Allan, VE3MNB, the young man who died at the controls of the Nationaair DC-8, July 11, in Jeddah, Saudia Arabia was the sort of guy everyone was proud to know.

There were some of us who knew instinctively when we first learned of the hideous crash, which killed 261 passengers and crew, that we had lost our friend Bill.

When Ralph VE3PBR, phoned me the morning after the crash, I dreaded what he was about to tell me; I knew he was going to tell me that Bill was dead.

I had met Bill Allan, at the Trenton Air Base Radio Club five or six years ago and had instantly liked his ready wit and generous spirit.

When Captain Allan was stationed at CFB Trenton, he flew transport with the 436 Squadron and was a duty operations officer and also an instructor on the Hercules filght simulator. Following his retirement as Captain in 1989 he was one of the last pilots to sign on with Wardair prior to their absorption by Canadian Airlines.

Bill's generosity was demonstrated to me, when, several years ago, a brutal late fall thunder storm wrenched my 5 element monoband yagi antenna out of its rotor. The tower is 147 feet high and the yagi was beginning to windmill.

I had never been higher than seventy feet and besides it was raining and slippery and I didn't own a climbing belt. I knew that if something was not done quickly I'd loose the coax and possibly the tower if the yagi came down on the guys.

I put out a distress call on 2-meters, using the Trenton repeater located at CFB Carrying Place.

Bill's cool reply was reassuring. "I'll be there in five

minutes."

Storming up my driveway in his beat-up Datsun sports car all he said was, "get me a couple of feet of heavy roap, while I get out of this jacket."

While the wind and rain lashed the tower, Bill hiked up, without a belt, and tied off the lurching yagi.

"Nothing to it, Eh?" I said to him as he returned to earth. "Well, not exactly," he said. "That beam must weigh a hundred and fifty pounds, and in this wind it has a mind of its own."

While Bill dried out we sat in the front room and talked for hours. It was then that I knew that this young man was no ordinary Joe; he was interested in everything, he was bright, absolutely forthright and it was obvious that he had every intention of realizing his long-ranged ambitions and dreams.

The days were never long enough for Bill, but when I had acquired my first computer it was Bill who tirelessly and enthusiastically guided me, hour by hour, through the complexities.

I know I speak for the hams who knew and loved him when I say that he is one ham and a friend to many, who will be dearly missed.

Bill rarely had time for the HF bands but when he occasionally turned up on 2-meters from the car, the hams would literally pile up just to say, "Hello Bill."

Everyone who knew him sensed that here ws a guy with substance.... I don't think Bill had a phony bone in him, and besides, he was someone you could count on in a pinch. It saddens us all to learn that Lady Luck must have been distracted that morning in far off Saudi Arabia because we've lost one of the best.

Don, VE3HGN Salem, Ont.

A.R.E.S. BULLETIN Aug 2, 1991

It is with great pleasure that I announce the activation of the Assistant Emergency Coordinater position. Mr Don Davenport, VE3BPL, has assumed responsibility for this position, and will be actively involved in the near future.

Three more VHF antennas have been placed in service, to be used in the event of a major emergency situation.

Two of these VHF antennas are on hospitals. Access to these hospitals will be as follows:

(1) Lennox-Addington County Hospital , 8 Park Drive, Napanee, Ontario. You enter the hospital through the Emergency Admitting door, and you are in a short hallway. On your left side are two offices. The second of these, or the furthest from the outer door, contains the coax cable for the A.R.E.S. antenna. The coax is up in the ceiling, over the accoustic tiles, on the left side of the room, 2nd tile from the rear of the room. Remove this tile, let the coax down and plug it into your 2

meter band radio. The termination is a PL-259 and a BNC adapter. The Exective Director, Mr. W. Arthur Ronald, will authorize your entry and use of the room for communications.

If circumstances force you to use the main entrance to the hospital, turn right in the entrance lobby, and proceed to the switchboard room down the hall. You can get directions there. You should have adequate A.R.E.S. identification card and photo with you, in case it may be requiried. Remember that from Napanee you may be requiried to talk to Kingston as well as Belleville, as Napanee is under the Kingston Emergency Plan. Antennas are planned for Kingston General Hospital and Hotel Dieu Hospital in Kingston. Meanwhile, access VE3KER repeater 146.940 (-6) and request the Kingston A.R.E.S. group to help you. Bob Boyd, VE3SV is the E.C. You also have KA2QJO repeater at Watertown, N.Y. available if you require it, 147.255 (+6). Because of the height of this antenna, you can reach Belleville and Kingston on simplex frequencies as well.

(2) Trenton Memorial Hospital, Trenton, 242 King Street. You enter this hospital by the Emergency Admitting and Outpatients door, the entrance closest to the street. On your right, immediately after you enter, is a glassed-in office. Enter this office and turn right to a second office, containing a telephone switchboard. Standing by the telephone switchboard, you have two office entrance doors on your left side. The second door opens to the corner office. The coaxial cable for the A.R.E.S. antenna is in the corner of this office, roght under the farther end of the window, coiled up behind a file cabinet. The coax terminates with a PL 259 and a BNC adapter. There is enough coax to extend out into the switchboard room, which will double as the hospital's emergency control room. Your entry will be authorized by Mr. Robert Carter, Executive Director, or his representative. Please have adequate A.R.E.S. identifier and a photo in case they are requested.

(3) Village of Tweed Fire Hall. Access to the village fire hall will be authorized by the reeve of Tweed or his representitive. The antenna coax is coiled up and hanging on the wall just over the desk in the south-east corner of the building, just inside the entrance door. The coax terminates in a PL 259 and a BNC adapter. Please have your A.R.E.S. identifier and photo available. the fire hall is on the street just west of Victoria Street and is on the west side of the street. Turn west off Victoria Street at the stop lights, trun north at the first street for 200 yards, and there is the fire hall.

It is expected that emergency communications in Tweed would be under the direction of Franc Cole, VE3BDS. However, it could develop that Franc would require further assistance to back the people he has on hand, or that Frank might not be available at the time a disaster situation developed.

Please remember that this bulletin, as well as the previous one of March, 1991, are extensions of the general guidelines shown in the bulletin of December, 1989.

In brief, you will be requested to respond to a disaster situation where telephone service and electric power service are likely no longer available. You will be under the radio direction of the Emergency Coordinator,VE3MB, or his representative, the Net Control Station.

All of this activity will be under the authority of the municipal emergency control group involved.

Please proceed in a calm and orderly pattern, setting by your examply, an atmosphere of order and understanding, so that those with and around you will be able to perform better.

Don't forget to keep an emergency kit in your auto. A chocolate bar or peanuts in your pocket would mean a great deal in a pinch, when a relief operator is not available.

FIELD DAY, 1991

June 22 & 23, 1991

Quinte ARC Field Day used Call Sign VE3RL for field day 1991.

The location was the Moira River Conservation Authority in Belleville.

We began setup at about 1800 UTC on Friday June 21, and there were about 30 people in attendance throught the weekend.

We operated 3 HF stations, with a 2M station for talking on the VE3KBR repeater.

Operation was Class A, Club group portable, using generator and battery for the power source.

The following is the breakdown fo contacts made and reported to CRRL for the exercise:

CW	80M	68 QSOs	100W
CW	40M	12 QSOs	100W
Phone	80M	201 QSOs	100W
Phone	40M	163 QSOs	100W
Phone	20M	110 QSOs	100W

The scoring was submitted as follows:

Total CW QSOs 80 X 2 = 160 points
Total phone QSOs 474 X 1 = 474 points
Total QSO points = 634

Total QSO points 634 X DC input multiplyer (less than 200W, X 2) = 1268 points

Bonus points will be added by CRRL for operating 100% Emergency power.

Bonus points will be added by CRRL for operating in a public place.

Watch the CRRL magazine for the report and standings.

Field Day, 1991 was, from my perspective, a success! We had two tent trailers and a full-size trailer on sight at the Moira River Conservation Authority lot. There were Amateurs comming and going all through the weekend, providing help setting up, operating, logging and taking down.

I personally enjoyed meeting Amateurs that I had talked to but never met, and certainly others had the same experience. For many of us, the opportunity to operate HF was a pleasure, because the basic license does not allow us to do it at home.

I would like to take this opportunity to thank everybody who provided assistance in setting up and taking down the equipment, and in particular, I would like to thank those people who donated the use of their radio equipment and accessories. Thanks must go to VE3MNL JO Ann for providing needed nourishment to those of us who were doing whatever we were doing throughout the weekend (and also for climbing the ladder to repair the antenna problem). VE3GTD and VE3BZY donated the use of their tent trailers, and I had my trailer there also.

Len Brooker - VE3ASR

You will note the advertisement that has been included in

this letter, Mr. Les Johnson has kindly donated the photocopying of this News Letter in exchange for the Ad. Thank you Les!!

I do hope that if any of the Club membership has anything that they want to place in the News Letter then should contact me on the air or at 968-9242. There is an answering machine at home so I will not miss any calls.

Your new News Editor
